Details: _____

Kerwick Appraisals Oriental Rug Worksheet

Instructions

Location/Room	This is where the item is presently located. Hint: Try to follow the same logical order when listing items, such as going clockwise around the area.
Page #	Use this area to organize your pages.
Item	Name the item in a one or two word description. For example: Oriental Rug or Sarouk.
Quantity	List how many of the items are in this location. If it's a pair put 2.
Date made	Put the age of the item as close as you know or select the Century. Remember, 20th Century means between 1900 & 2000. "Antique" is considered over 100 years old.
Country/Origin	Select the country where the item was made or select the appropriate area. Check for label. For Example: IRAN, CHINA, TURKEY
Material	Select one of the words and add what you know on the line. For Example: SILK FRINGE
Description	Add as much information as you can that would help someone distinguish this item from others like it. For example: it has birds sitting on branches; or it is signed in the border. If you know any history of the item, mention it here. For example: Inherited from your grandmother or purchased in 1998 at a Holiday Inn auction and paid \$2500.00 by check.
Size	Measure the length and width without the fringe in inches. L x W = Sq. Ft. For example: 8' X 10' = 80 SQ FT
Condition	Mention any damage and select the condition. Here are the definitions that Kerwick Appraisals use to define the condition: Excellent Like new, no restoration needed. Good Typical for its type and age with normal wear and tear. Poor Restoration is needed and would greatly enhance its present value unless the cost would exceed the value of the item. For example: POOR with numerous urine stains and border missing
